13 MS. KOZLOWSKI: My name is Terry,
14 K-O-Z-L-O-W-S-K-I. My address is 901D Willow Tree
15 Drive, Las Vegas, 89128.
16 Las Vegas is classified as a 2-B earthquake
17 zone when it comes to building. They're getting ready
18 to increase that to a 3, a level 3. Level 4 is
19 California. And we know what kind of earthquakes they
20 have in California. We've had our own earthquakes
21 here. None quite as devastating as the ones that you
22 find in California, but I think that this facility
23 would be better located in a less earthquake tolerant
24 area.
25 Quite frankly, I don't want to bring my

0050

1 children up where there is nuclear waste being stored.
2 I was born here. There was no nuclear waste. We had
3 bombs, okay, we had bombs. But, why should we have to
4 take everybody else's trash and store it in our state?
5 Let them store their trash in their state. That's
6 where it should stay. I don't need New York's garbage.
7 We already get enough of their people. They can keep
8 their nuclear waste.
9 That's it. That's my statement.
